Additional comments

Additional Questions

Was the navigation of the app simple?

What is your impression of the user interface?

What feature would you add or remove?

Did anything confuse you?

Would you ever see yourself using this app?

Instructions to be read to users

Welcome to Clockwork, our app is a hybrid mobile application that seeks to streamline the planning it takes to hand out with your friends.The app provides users the ability to quickly publish and join events without the hassle of having to call, text or message your friends.If at any point during the testing you are completely stuck do not be afraid to ask for help.Please remember we are testing the software not you.At the end of your testing there will be 5 short questions that we would like you to answer,thank you for your time.
